中国環境科学学会大気環境分会の紹介

Association of Atmospheric Environment of Chinese Society for Environmental Sciences

1. Organization

Association of Atmospheric Environment was founded in 1978, and it's one of the branches of the Chinese Society for Environmental Sciences (CSES) (the 5A-level society of the state), which is affiliated with the Chinese Research Academy of Environmental Sciences (CRAES). It has become one of the most influential academic organizations in the field of atmospheric environment in China and the largest scientific and technological association of atmospheric environmental protection.

2. Aims

Association of Atmospheric Environment is committed to providing an important communication platform for atmospheric environmental scientists, engineers and technicians, environmental educators and environmental managers in China. It has played an important role in improving the overall academic level of China's atmospheric environment discipline and the ability to solve major national atmospheric environmental problems.

3. Main Activities

- Annual conference and exhibition every year (Fig. 1, Fig. 2)
- Science propaganda of environmental protection
- Recommendation of excellent science and technology talents

4. Contact Info

Dayangfang 8, Chaoyang District, Beijing, China

Tel: +86 10 84915250
