Introduction of Korean Society for Atmospheric Environment (KOSAE)

President of KOSAE
Sunwoo Young

1. Organization

The Korean Society for Atmospheric Environment (KOSAE) was founded in 1983, and it currently has 2,800 members from universities, research institutions, corporations, and national and local governments. The society is one of the major environment-related associations in Korea, and it has various relationships with international societies including JSAE.

2. Aims

KOSAE covers the areas of environmental management, climate change, measurements and analyses, atmospheric dispersion and reactions, indoor air quality, human health and ecosystem, pollution control technologies, etc. Its aims are to contribute to the “clean atmospheric environment” while running various research and developments, academic activities, and providing information to the general public.

3. Main Activities

- Annual conference and exhibition every year;

Fig. 1 General assembly during the 2017 annual conference in Daegu, Korea.

- Workshops on special topics for environmental industries;
- Special symposia and seminars organized by research divisions of the Society;
- International and regional collaborations with various societies and associations worldwide including the International Union of Air Pollution Prevention and Environmental Protection Associations (IUAPPA), Clean Air Asia (CAA), and others;

- International conferences and workshops such as the 12th IUAPPA World Clean Air Congress (2001) and the 17th IUAPPA World Clean Air Congress and 9th CAA Better Air Quality Conference (2016);
